Retirement

PACE does not operate a formal retirement policy. If you choose to work past the state pension age you can receive your pension while still working.

We will not ask you about your plans however if you want to talk about your retirement, we welcome the discussion and encourage you to talk with your manager as early as you feel comfortable. If you choose to tell us we will offer support which might include talking with you about reducing your working hours or to offering a different working pattern and/or offering counselling or financial advice.

If you plan to retire, you will need to give a minimum of the notice period outlined in your contract.
